

# VPN Tracker 7

## The Market Leading VPN Client for OS X

VPN Tracker is the market leading VPN client for Mac OS X. The brand new VPN Tracker 7 is developed for professional use by consultants and businesses. VPN Tracker uses the industry standard IPsec protocol and is universally applicable. It supports standard and vendor-specific methods for automatic configuration and authentication. VPN Tracker includes device profiles for more than 300 VPN gateways of the leading manufacturers.

### Network Scanner **NEW**

Easily scan for devices and available services in remote networks. Instantly and securely connect to specific services.

### Accounting **NEW**

VPN Tracker 7 takes care of time tracking so you don't have to. Export data for billing, and you'll see how quickly it pays off. After all, time is money.

### Manage Multiple Connections **NEW**

VPN Tracker 7 Pro is great for power users and consultants. Be connected to multiple VPNs simultaneously and stay organized with search and improved groups, even with lots of VPNs and clients.

Discover the complete new feature set on [www.vpntracker.com](http://www.vpntracker.com)
